

READICULOUS

FIRST THINGS FIRST: PHONICS

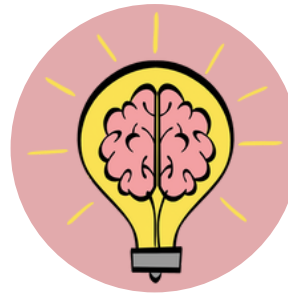

68% of US fourth graders are not proficient readers. We know that is rooted in lacking foundational phonics skills. **Readiculous** uses the Science of Reading to drive early skill development in reading foundations.

Readiculous is effective because it's fun! Players move through an evidence-based learning sequence of phonemes and high-frequency sight words as they strengthen reading skills. Alongside our cast of zany characters, kids help unlock new stories and explore a magical treehouse while conquering phonics.

ENGAGING MINI-GAMES

Kids move through a sequence of mini-games, structured to give them multiple exposures to each phoneme as they master their sounds.

EVIDENCE-BASED

Readiculous is rooted in the Science of Reading, a phonics-first approach to learning to read. Experts say that's how kids learn best.

10 MINUTES PER DAY

All it takes is 10 minutes of daily gameplay: just enough screen time for a phonics boost. (By the way, you'll never see an ad in our game.)

DATA THAT MATTERS
